# Improving the way you work

Running the intuitive Android operating system, the GFX-750™ display performs at high levels for an intermediate price. The system allows you to customize the display for the way you work, and is highly expandable to meet your farm's growing needs.

## Reasons to Upgrade to GFX-750

- > See your full farm in one place
- > Seamless data transfer between multiple displays
- > No need to reload data
- > No need to reconfigure implements
- > Make your implements smarter
- > More intuitive interface for all levels of operators
- > Re-use many of the same harnesses and cables
- > Easier than ever to do more with your technology

# GFX-750 Display

The Trimble® GFX-750™ display continues a strong tradition of sleek, easy-to-use displays from Trimble Agriculture. With a simplified installation process, your cab will be less cluttered with this automated guidance system. Add in Bluetooth® and Wi-Fi™ connectivity to go along with ISOBUS compatibility and you can tackle farming applications from every season across all of your equipment brands.

**Android™ system facilitates your farm work**

**Simple, intuitive Precision-IQ™ platform to conduct all field operations**

**ISOBUS-ready to control your implements**

**Built-in Wi-Fi and Bluetooth connectivity**

# Agricultural Intelligence in your hands

With the Trimble GFX-750 display you have complete command over your field work. Save time while increasing your productivity and profit with a single display system to control your guidance, steering and implements. Make data-based decisions on the go with Trimble Connected Farm® solutions and the GFX-750 display.

“You can get more done in a day with GPS-aided products. We **produce more** right now than generations before.”

Joe Brightly – Brightly Farms, western New York

# Customize your system

Our flexible solutions allow you to select from a range of hardware, software and accuracy options to meet your specific needs. Talk to your dealer to determine the ideal combination for your farm operations.

## Create your own Trimble solution

To discover the best configuration for your needs, download the FAST app – Flexible Agriculture Solutions by Trimble. The tool will show a recommended product combination based on your answers. Available on the web at [ag.trimble.com/fastapp](http://ag.trimble.com/fastapp) as well as on iOS and Android.
