

FarmTRX™

FarmTRX to FieldView™ Compatibility

HOW DOES IT WORK?

FarmTRX Yield Monitors install on any combine, allowing farmers to connect to and power the FieldView™ Drive in the cab via wiring compatible with CANBus messaging.

- Equip any age combine for precision ag
- Automatic delivery of FarmTRX yield data into FieldView™
- View live mapping in the cab
- Maximize insights and make better decisions with your farm data

GETTING SET UP

1. Determine what hardware you will need by referring to the FarmTRX to FieldView™ Compatibility Manual
2. Install and connect the FieldView™ Drive and FieldView™ Adapter Cable and update to the latest version of the FarmTRX Harvest App
3. Set up the FarmTRX Harvest App with a simple calibration
4. Set up the FieldView™ Cab App
5. Begin harvesting!

Get your yield data where and how you need it.

**FieldView™ Drive available at climatefieldview.ca/pricing*
